# 2023 Lineup Brochure

# and roid tv

## The four pillars of performance, Unifying our solutions with your business needs

Our new lineup of BRAVIA Professional Displays incorporates all the picture quality, installation flexibility, robust usability and sustainability requirements needed for today's commercial applications.

## **Picture Quality**

In addition to Sony's unique picture processing, wide color gamut, and high-contrast technologies, our new Deep Black Non-Glare Coating technology minimizes glare with impressive image quality.

\*Deep Black Non-Glare Coating in BZ40L Series only

### **Installation Flexibility**

Available in a wide range of sizes and ever-evolving installation flexibility, to fit a variety of spaces.

# **Robust Usability**

Packed with useful functions, purpose-driven applications, and customized settings to make daily operations more efficient.

## **Sustainability**

Making it, moving it, using it more efficiently: improving multiple aspects across the product life cycle, such as reduction of virgin plastic, improvement of transportation efficiency, and review of power consumption during use.

# **Picture Quality**

\*BZ40L feature

Non-glare coating

Sony's Deep Black Non-Glare Coating is a big step forward in panel technology, reducing screen reflection without compromising image brightness, contrast, detail and clarity. The result: bright, attention-grabbing pictures with rich colors and deep blacks that are seen clearly from any angle.

#### One chip, incredibly real images

#### Cognitive Processor XR™

The Cognitive Processor XR™ chip analyzes and recreates content based on human sight and hearing, to deliver pictures with the utmost depth and reality.

#### 4K HDR Processor X1<sup>™</sup>

With Object-based HDR remaster and Super Bit Mapping 4K HDR technology, our new 4K HDR Processor X1 reproduces more depth, textures and natural colors than our 4K Processor X1. You'll see pure colors at higher brightness levels for exceptionally realistic pictures.

\*In BZ50L Series only

Improve sales promotions with striking picture quality

Communicate effectively with detailed text and graphics

#### Installation Flexibility

In addition to landscape, portrait, and tilt installation, BRAVIA Pro Displays can be used with mobile stands for effective use of space, and ceiling mounted for digital signage.

Special installations such as easel stands, and multi-display installations are also possible.

Easel stand

Casing stand

Multiple displays

#### **Consistent lineup design**

The design of the BZ-L series displays is standardized, allowing for uniformity when mixing models. Wiring is also standardized, making installation easier.

#### **Consistent platform**

The BZ-L Series' SoC and Android OS platform are common across all series, allowing for simple installation.

\* 24/7 Operation

#### 24/7 Operation

Business never sleeps: BRAVIA is engineered for dependable 24/7 operation in the most challenging corporate and commercial environments.

#### Side logo position

The Sony logo is positioned on the top right side of the display bezel, so nothing distracts your audience from immersive images.

# **Robust Usability**

#### High Performance SoC

Equipped with a high performance SoC, high-resolution video can be played smoothly and easy to display interactive signage content without the need for a dedicated set-top box, media player or PC.

#### **Pro Settings**

When it comes to business, we know there's no such thing as "one size fits all." That's why our BZ-L series comes with our Pro Mode technology as standard – giving you multiple customization options at the touch of a button.

#### Sony Signage Solution

On-board BRAVIA Signage Free (BSF) software automatically plays out HTML content, video and photos.

#### **Partner Solutions**

We work closely with top companies to add even more value to our innovative AV products, for networking, device management, automation, digital signage, and more.

#### HTML5

#### Flexible content layout with HTML5

The BZ Series offers built-in support for the HTML5 application platform, so it's possible to use HTML5 interactive signage content without requiring a set-top box or PC.

The content screen can be freely laid out using the 4K video, pictures, or even with a HDMI input.

#### Mirroring

#### Wireless screen mirroring

Easily mirror content wirelessly from a handheld device onto BRAVIA with in-built support for Apple AirPlay and Chromecast built-in.

#### **IP** control

Remote control for multiple display BRAVIA Pro Displays offer IP control with many display features like switching input sources via IP. Both HTML5 and Android apps running on the display can send IP control commands to the display and can be run from external IP-enabled devices.

#### Making it, moving it, and using it more efficiently: Advanced engineering for sustainability

To reduce environmental impact, we are focused on multiple aspects across the product life cycle, such as reduction of virgin plastic, improvement of transportation efficiency, and more efficient power consumption.

#### STEP 1 Making it

# Towards closed loop with repeated recyclability

One advantage of SORPLAS<sup>™</sup> is that it won't degrade too much even after being recycled several times.

Recycled SORPLAS<sup>™</sup> parts have the potential to reduce the volume of waste and contribute toward a recycle-oriented society. \* All BZ-L series include Sony's SORPLUS recycled plastic

#### STEP 2 Moving it

# Cutting CO2 with smaller and lighter Packing

By reengineering the packaging that protects the product during shipping, we cut the package size by 15% and total weight by 10%. This increases the number of units on one pallet by approximately 1.3 times. As a result, CO2 emissions per unit from product transportation have been reduced by apporoximately 15%.

#### STEP 3 Using it

# All your energy-saving settings in one place

With the flexible and configurable Eco Dashboard, energy saving settings can now be centrally managed.

You can easily customize energy saving settings for your usage, viewing environment, and the content you are watching, all in one place, and visualize the contribution you are making to reduce environmental impact.

# BZ50L

Experience absolute picture quality with Sony's flagship professional 4K display and Sony XR™ processing.

21

98"

#### Spectacular 780 nit brightness

Brighter is better. In busy retail showrooms or corporate lobbies, 98" BRAVIA shines with an extraordinary 780 nit screen brightness that can't be missed, even in light-flooded spaces. Full Array Local Dimming boosts peak brightness further still to an eye-popping 1500 nits.

#### Lighten the load

The 98" BRAVIA BZ50L weighs around 21kg (46lbs) less than the previous 100" 100BZ40J model, lightening the load on installation teams.

#### Safer carrying

Ergonomically positioned lower horizontal handles are easy to grab, making lifting easier and more comfortable.

#### **Easier access**

Reduced carton size eases transportation. The ability to carry BRAVIA vertically (portrait style) gives easier access in elevators and stairways.

#### Cognitive Processor XR™

The world's first picture processor with cognitive intelligence understands how humans really see the world. The 98″ BRAVIA with Cognitive Processor XR<sup>™</sup> opens up an unprecedented viewing experience that immerses you even more deeply in the scene.

# BZ40L

Exceptionally bright 4K displays with unique Deep Black Non-Glare technology

#### Deep Black Non-Glare Coating

#### Deep Black Non-Glare Coating

Deep Black Non-Glare Coating combines innovative technologies – delivering an unprecedented reduction in both screen glare and reflection that doesn't compromise picture quality.

#### Anti-Glare

A microscopic unevenness is added to the surface of the display panel. Incident light is diffusely reflected in all directions, becoming a whitish blur that's less noticeable to viewers than sharply reflected light.

#### Low Reflection

A special coating is added to the surface of the panel. Incident light rays bounce off the surface of the clear layer, as well as the panel surface beneath. Interference between the reflected rays causes cancellation, reducing reflections seen by viewers.

Sony's Deep Black Non-Glare Coating combines anti-glare and low-reflection technologies. Reducing reflections and boosting contrast, it's the key to dynamic visuals bursting with true-to-life color and detail that inspire everyone, from corporate visitors and staff to shoppers and students.

#### Exquisite images that always stand out

Available in screen sizes from 55" to 85", the BRAVIA BZ40L Series grabs your audience's attention with extremely high 700 nit screen brightness for punchy, high-impact visuals that are always seen clearly.

Advanced Sony picture processing technologies ensure your content looks its very best. The panel's extra wide viewing angle lets everyone in the room enjoy clear, bright images, wherever they're positioned.

#### Styled to blend with every environment

- BRAVIA Pro Displays come supplied with a Wall-Mount Adjuster, giving extra flexibility for mounting the display centrally in portrait or landscape orientation.
- The Sony logo is discreetly positioned on the edge of the display's beautifully slim bezel with nothing distracting your audience from immersive images.
- Install BRAVIA in portrait or landscape orientation to suit any corporate or retail space. The display can also be tilted at an angle for even greater flexibility.

# BZ35L

Enhanced professional displays with 32GB of storage and more robust brightness

**X**1

HDG

BRAVIA BZ35L Series grabs your audience's attention with high 550 nit screen brightness for punchy, high-impact visuals that are always seen clearly.

Advanced Sony picture processing technologies ensure your content looks its very best. The panel's extra-wide viewing angle ensures that everyone in the room can enjoy clear, bright images wherever they're positioned.

#### Large 32GB internal storage

The internal memory on some other displays is eaten up by the operating system, leaving little space for your own apps and content. BRAVIA BZ35L doubles internal storage from 16GB to a generous 32GB – giving loads more room on board to hold apps, photos, videos and digital signage.

#### Styled to blend with every environment
