Key Benefits

Unparalleled brightness, incomparably beautiful colours | Step into a new realm of realism with our brightest 4K ever. Unlike other TVs, our expanded colour volume keeps images vivid and saturated even at high brightness levels, so you see pictures just as the creators intended. Our theatre-like sound powered by Acoustic Multi Audio+ will further enhance your cinematic experience at home and you can enjoy an almost endless library of apps & content via the intuitive Google TV platform.

Definitive contrast. Professional monitor core technology | Similar to the backlight control core technology in Sony master monitors*, XR Backlight Master Drive with a unique dimming algorithm controls thousands of LEDs precisely for truly authentic contrast. Also with higher luminance than ever, BRAVIA 9 can faithfully reproduce detailed scenes, even in the brightest daylight.

Unmatched realism with XR Processor | Powered for precision. Our XR Processor features a scene recognition system that detects and analyses data with flawless accuracy, then optimises the picture for ultimate realism.

Crystal clear pictures, with even fast-moving action staying smooth, bright and crisp | XR Clear Image uses a custom database to intelligently convert your favourites to near 4K. Noise is minimised by XR Clear Image through zone division and dynamic frame analysis.

XR Motion Clarity™ analyses movement across several frames and precisely synchronises the backlight with on-screen motion so you see clear, bright images, however fast the action.

Our most cinematic sound. World's first TV with Beam Tweeter | Feel like you're in the cinema. Acoustic Multi-Audio+™ with Beam Tweeter at the top and Frame Tweeter at the sides delivers cinematic surround sound. Every sound comes from exactly the right place.

Entertainment you love. With help from Google | Google TV™ brings together movies, shows, and more from across your apps and subscriptions and organises them just for you. Browse 400,000+ movies and TV episodes from across your streaming services, all in one place and organised into topics and genres based on what interests you.

Eco Dashboard 2 - Check your eco settings. See your power usage | Easily change eco settings, individually or in one go. Eco Dashboard 2 puts everything conveniently in one place and can even monitor your power consumption for optimum efficiency.

BRAVIA 9 FWD-XR90 QLED

- 4K HDR QLED (XR | Mini LED)
- High Peak Brightness
- XR Backlight Master Drive
- XR™ Cognitive Processor
- Acoustic Multi Audio+
- Google TV

* The backlight control of Master Monitor BVM-XH3110, used for final image quality checks at Studios, and XR Backlight Master Drive in BRAVIA were developed based on the same Sony core technology. Apps must be compatible with TV. App availability varies by region and device.
