elipson® | Chroma 400 RIAA BT

TURNTABLE

It also offers a Bluetooth connection in high resolution 24 bits to enjoy any connected speaker...

The Elipson Chroma 400 RIAA BT is a belt-driven manual turntable with an elegant design offering a lacquered paint or satin wood finish. Benefiting from our latest technologies, it can be connected directly to any amplifier, active speaker using RCA cable or in Bluetooth mode (aptX HD) with no loss of signal quality.

Assembled in France in our premises, the Elipson Chroma 400 RIAA BT offers the characteristics that contributed to the success of the Omega models such as the OTT (Orbital Torsion Tonearm) tonearm in carbon, its digital processing system of the motor rotation. It is distinguished by a new axis system for an even more precise rotation, an improved drive motor with optimized damping, a graduated counterweight, as well as by the addition of a cue control lever for your comfort of use

Its integrated Phono-RIAA circuitry offers all the features of more expensive separate components with a choice of moving magnet and moving coil cartridge as well as a very high and faithful resolution of vinyl record signals.

It also offers a Bluetooth connection in high resolution 24 bits to enjoy any connected speaker and a USB type B port to digitize your vinyl records.
